

ENGE CORPS

ENGE CORPS is a consulting engineering company based in Alphaville, Barueri, SP, which has been operating for over 20 years in the Brazilian and the international markets and it has been developing successful engineering projects in the Central and South America.

Over this period, it accumulated knowledge and experience in projects of all sizes, especially in those which quality and innovative solutions are needed in all the different segments in which it operates. This confirms it as one of the leading companies in quality and proficiency in the Brazilian market and has promoted its inclusion in the TYP SA Group in August 2009.

It is dedicated to developing projects in the various areas of knowledge and is prepared to meet the more specific requests, always within the norms and technical standards required, thus gaining excellence in the implementation of all steps inherent in the project.

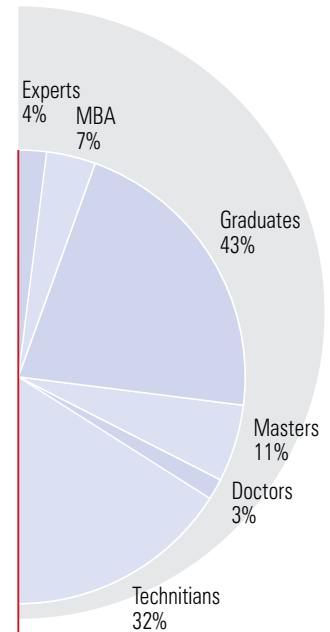

It employs a highly qualified staff - 68% the staff have higher education qualifications, and the average age is 43 and the mean working time with the company is 5 years .

The structure of the company, which is decentralized in specific business areas, aids the flexibility in meeting the needs for each customer, adapting itself to possible market fluctuations. All in all, ENGE CORPS offers individually specific services according to the clients' specific needs, be they technical or managerial.

a global consulting Group

Since 2009, ENGECORPS is part of the TYPASA Group, which is formed by a number of consultancy engineering companies. TYPASA headquarter is based in Spain, with offices and representatives offering their 40 year market experience in over 60 countries successfully executing major infrastructure projects in Europe, the Americas, Africa and the Middle East to improve and sustain enhanced living conditions around the world.

Founded in 1966, TYPASA is now one of the largest Spanish consultancy companies in its field, and a national leader in the exporting of consultancy services in civil engineering, according to the Engineering News Record (ENR).
